

C# & .NET MCQ Practice Test

60 MCQs covering .NET Ecosystem, C# Basics, OOP, Interfaces, Namespaces and Exception Handling

Tip: Try answering each question yourself before checking the answer.

1. Which platform is the modern, cross-platform successor to .NET Framework?

- A) .NET Core / modern .NET
- B) VB6
- C) COM+
- D) Silverlight

Answer: A

2. What does CLR stand for?

- A) Common Language Runtime
- B) Common Library Resource
- C) Common Language Repository
- D) Core Language Runtime

Answer: A

3. Which .NET platform was primarily designed for Windows only?

- A) .NET Framework
- B) .NET Core
- C) .NET 8
- D) .NET 9

Answer: A

4. Which .NET version introduced the unified modern .NET platform?

- A) .NET 5
- B) .NET Framework 4.8
- C) .NET Core 1.0
- D) .NET 3.5

Answer: A

5. What is the main purpose of the CLR?

- A) Execute and manage .NET code
- B) Design web pages
- C) Store databases
- D) Compile CSS

Answer: A

6. What is an assembly in .NET?

- A) A compiled unit containing IL, metadata, and resources
- B) A database table
- C) A C# variable
- D) A network protocol

Answer: A

7. Which file extension is commonly used for a .NET class library assembly on Windows?

- A) .dll
- B) .html
- C) .css
- D) .sql

Answer: A

8. Which file extension is commonly used for an executable .NET application?

- A) .exe
- B) .dll
- C) .cs
- D) .json

Answer: A

9. What does CLI stand for in the .NET ecosystem?

- A) Command Line Interface
- B) Common Library Interface
- C) Code Language Interpreter
- D) Core Logic Integration

Answer: A

10. Which command creates a new .NET project?

- A) dotnet new
- B) dotnet make
- C) dotnet create-project
- D) dotnet start-new

Answer: A

11. Which command builds a .NET project?

- A) dotnet build
- B) dotnet compile-project
- C) dotnet make
- D) dotnet generate

Answer: A

12. Which command runs a .NET project?

- A) dotnet run
- B) dotnet execute
- C) dotnet start
- D) dotnet launch

Answer: A

13. Which command restores project dependencies?

- A) dotnet restore
- B) dotnet packages
- C) dotnet install
- D) dotnet dependencies

Answer: A

14. Which C# type stores a whole number such as 25?

- A) int
- B) string
- C) bool
- D) char

Answer: A

15. Which C# type stores true or false?

- A) bool

- B) int
- C) double
- D) string

Answer: A

16. Which C# type stores a single Unicode character?

- A) char
- B) string
- C) byte
- D) bool

Answer: A

17. Which C# type is used for text?

- A) string
- B) char
- C) text
- D) StringData

Answer: A

18. Which type is generally used for double-precision floating-point values?

- A) double
- B) int
- C) bool
- D) char

Answer: A

19. Which keyword declares a constant in C#?

- A) const
- B) static
- C) fixed
- D) readonlyonly

Answer: A

20. Which symbol is used for assignment in C#?

- A) =
- B) ==
- C) =>
- D) :=

Answer: A

21. Which operator checks equality?

- A) ==
- B) =
- C) !=
- D) ===

Answer: A

22. Which operator represents logical AND?

- A) &&
- B) ||
- C) !
- D) &|

Answer: A

23. Which operator represents logical OR?

- A) ||
- B) &&
- C) !
- D) ^^

Answer: A

24. Which operator represents logical NOT?

- A) !
- B) ~
- C) not
- D) !=!

Answer: A

25. Which statement is used for conditional branching?

- A) if
- B) loop
- C) repeat
- D) choose

Answer: A

26. Which statement is suitable for selecting among many fixed cases?

- A) switch
- B) foreach
- C) try
- D) using

Answer: A

27. Which loop executes while a condition remains true?

- A) while
- B) switch
- C) case
- D) catch

Answer: A

28. Which loop is commonly used to iterate over every element in a collection?

- A) foreach
- B) switch
- C) try
- D) if

Answer: A

29. Which keyword immediately exits a loop or switch?

- A) break
- B) stop
- C) exitloop
- D) returnloop

Answer: A

30. Which keyword skips the current loop iteration?

- A) continue
- B) skip
- C) next

D) pass

Answer: A

31. What is a method in C#?

- A) A block of code that performs a task
- B) A database
- C) A namespace only
- D) A compiler

Answer: A

32. Which keyword specifies that a method returns no value?

- A) void
- B) null
- C) empty
- D) none

Answer: A

33. What are parameters?

- A) Inputs defined in a method declaration
- B) Outputs only
- C) Classes only
- D) Exceptions

Answer: A

34. Which keyword sends a value back from a method?

- A) return
- B) send
- C) output
- D) result

Answer: A

35. Which block is used to handle exceptions?

- A) catch
- B) handle
- C) error
- D) except

Answer: A

36. Which block contains code that may cause an exception?

- A) try
- B) catch
- C) throw
- D) finally

Answer: A

37. Which block normally executes whether an exception occurs or not?

- A) finally
- B) final
- C) always
- D) default

Answer: A

38. Which keyword explicitly raises an exception?

- A) throw
- B) raise
- C) error
- D) exception

Answer: A

39. What is a class?

- A) A blueprint for creating objects
- B) An instance only
- C) A loop
- D) A namespace only

Answer: A

40. What is an object?

- A) An instance of a class
- B) A method parameter
- C) A namespace
- D) A compiler

Answer: A

41. Which keyword is used to create an object in C#?

- A) new
- B) create
- C) object
- D) make

Answer: A

42. Which OOP concept hides internal implementation details?

- A) Encapsulation
- B) Inheritance
- C) Polymorphism
- D) Compilation

Answer: A

43. Which OOP concept allows a class to derive from another class?

- A) Inheritance
- B) Encapsulation
- C) Abstraction only
- D) Overloading

Answer: A

44. Which symbol is used to specify a base class in C#?

- A) :
- B) ->
- C) extends
- D) inherits

Answer: A

45. What is polymorphism?

- A) One interface/name having multiple implementations or forms
- B) One class having no methods
- C) Multiple namespaces only
- D) One variable only

Answer: A

46. Which is an example of compile-time polymorphism?

- A) Method overloading
- B) Method overriding
- C) Exception handling
- D) Namespace import

Answer: A

47. Which keyword is commonly used when a derived class replaces a virtual method implementation?

- A) override
- B) overload
- C) replace
- D) virtualize

Answer: A

48. Which keyword allows a base class method to be overridden?

- A) virtual
- B) override
- C) dynamiconly
- D) abstractmethod

Answer: A

49. What is an interface?

- A) A contract that specifies members a class can implement
- B) A database
- C) A loop
- D) An executable file

Answer: A

50. Which symbol is used when a class implements an interface?

- A) :
- B) implements
- C) ->
- D) with

Answer: A

51. Can a C# class implement multiple interfaces?

- A) Yes
- B) No
- C) Only two
- D) Only in .NET Framework

Answer: A

52. What is a namespace used for?

- A) Organizing types and avoiding naming conflicts
- B) Executing loops
- C) Storing passwords
- D) Creating databases

Answer: A

53. Which keyword imports types from a namespace?

- A) using
- B) import
- C) include
- D) namespace-use

Answer: A

54. Which access modifier makes a member accessible from anywhere it is visible?

- A) public
- B) private
- C) protected
- D) internalonly

Answer: A

55. Which access modifier restricts a member to its containing type?

- A) private
- B) public
- C) protected
- D) global

Answer: A

56. Which access modifier allows access within the class and derived classes?

- A) protected
- B) private
- C) publiconly
- D) inherited

Answer: A

57. What is a constructor?

- A) A special method used to initialize an object
- B) A loop
- C) An exception
- D) A namespace

Answer: A

58. Which method name is used as a constructor?

- A) Same as the class name
- B) Main
- C) Constructor
- D) InitOnly

Answer: A

59. What happens when an exception is not handled in the current method?

- A) It can propagate to the calling method
- B) It is always ignored
- C) The compiler fixes it
- D) The program always continues normally

Answer: A

60. Which exception is commonly caused by dividing an integer by zero?

- A) DivideByZeroException
- B) NullReferenceException
- C) IndexOutOfRangeException
- D) FormatException

Answer: A

61. Which exception commonly occurs when accessing a member through a null reference?

- A) NullReferenceException
- B) DivideByZeroException
- C) IOException
- D) ArithmeticException

Answer: A

62. Which exception can occur when an array index is outside its valid range?

- A) IndexOutOfRangeException
- B) NullReferenceException
- C) FormatException
- D) DivideByZeroException

Answer: A

63. Which keyword defines an interface?

- A) interface
- B) contract
- C) implements
- D) protocol

Answer: A

64. Which keyword defines a class?

- A) class
- B) type
- C) objectclass
- D) define

Answer: A

65. Which keyword prevents a class from being inherited?

- A) sealed
- B) final
- C) locked
- D) closed

Answer: A

66. Which keyword indicates that a class cannot be directly instantiated?

- A) abstract
- B) virtual
- C) static
- D) interface

Answer: A

67. Which keyword is used to declare a class member shared by the class rather than each object?

- A) static
- B) shared
- C) global
- D) common

Answer: A

68. Which C# statement handles multiple exception types using separate handlers?

- A) Multiple catch blocks

- B) Multiple try blocks only
- C) switch only
- D) foreach

Answer: A

Quick Answer Key

1. A
2. A
3. A
